ISRAELI GENOCIDE PROTESTED—An association of various Arab groups—principally Lebanese and Palestinians—protested the Israeli invasion of Lebanon in a demonstration in Washington on June 14 (left photo). They were joined by Haviv Schieber (right, in right photo), chairman of the Holy Land State Committee. Schieber, an anti-Zionist Jew and former close associate of Israeli Prime Minister Menachem Begin, lobbies internationally for a demilitarized Holy Land state. The Organization of Arab Students, in a prepared statement, said, in part: "Israel could not have done this (destroyed Lebanon, killing thousands of civilians) all on its own. The weapons used in this massacre are American made, from the artillery shells to the F-15s and F-16s. More important than the use of U.S. arms has been the green light given to the Zionists by the hawkish and dogmatic Reagan administration." The Establishment media gave scant notice to the plea for racial justice and "human rights."
